MEMORANDUM

From: Public Works Officer
To: Assistant Chief of Staff, Facilities (Attn: A. Austin)
Subj: MEDICAL AND DENTAL MILITARY CONSTRUCTION PROGRAM
Ref: (a) CONAVHOSP ltr 1100 13/H of 4 May 87

1. The reference provided project documentation for the subject program. Review of the projects has been completed and the following comments are offered:

a. FY-91 MILCON Project P-607, Medical/Dental Clinic, Court-house Bay. When computing facility requirements, was consideration given to the present and projected increase student loading?

It should be noted that in 1984, the annual average student load for the Marine Corps Engineer School (MCES) was 414 students per month. In 1985, the annual average student load grew to 636 students per month and in 1986, the annual average was 522 students per month. For 1987, the average student load during January-March, was 813 students per month. In addition, the relocation of the Basic Engineer Equipment Operator's Course from Fort Leonard Wood, Missouri to MCES in FY-88 will raise the monthly student load by an additional 100-150 persons.

b. FY-92 MILCON Project P-703, Medical/Dental Clinic, Camp Johnson. When computing facility requirements was consideration given to the relocation of the Drivers Training School from Camp Geiger to Camp Johnson in FY-91? It should be noted that, the increase in permanent military personnel will be approximately 110 instructors and 20 vehicle maintenance workers. In addition the school will be training approximately 3,334 students annually.

2. Point of contact for this Command is Mr. W. L. Brant at extension 1833.
